

To be market leaders, Total Electrical Construction Pty Ltd (trading as TEC Contracting) is committed to sustainable and responsible environmental and social practices in all areas of our business.

We are committed to preventing pollution and minimising any impacts to the communities and to the environment in which we operate now and in the future. Our goal is zero reportable environmental incidents.

We will:

- Implement and maintain our Environmental Management System and our practices based on the principles of AS/NZS ISO 14001:2004.
- Identify environmental hazards and minimise all hazards with risk assessments and controls.
- Comply with all applicable laws, regulations, and other requirements that we subscribe with.
- Develop a culture of environmental responsibility through increasing awareness, developing skills and competency of all our employees and sub-contractors.
- Annually set and review plans, objectives, targets and programs to improve our performance.
- Report and investigate all environmental near misses and incidents.
- Choose low risk materials and substances where possible when purchasing.
- Minimise waste through recycling all redundant, used and unwanted materials where possible.
- Support community development.

We seek the cooperation of all employees, suppliers, sub-contractors and others for realising our environmental objectives.

Grant Dempsey
Director
